

Microfiber Towel Product and Service Benefits

Microfiber Cloth – Proven to remove 99.9% of microbes with just water.

Additional Features and Benefits:

- Virtually lint free
- Environmentally friendly – Dries fast, uses less detergent, and saves water
- Strong and durable. Use wet or dry on any surface.
- Very effective. Traps more dust and dirt.
- Better ergonomics - Microfiber towels require less pressure than a cotton towel, so there is less fatigue on the person using the towel

Here are a few fun facts for your customers:

1. Most workplace phones have up to 25,127 germs per square inch, keyboards 3,295 per square inch, and computer mice 1,676 per square inch.
2. Those sinks in the break room or next to the coffee maker have more germs than a toilet.
3. By simply disinfecting office desks frequently, companies can reduce sick days in the office by 30%.
4. Air quality in a closed space can be 500% worse than out in the open air.

These facts alone should get your customers to add your microfiber towels to their service!

Tire Blow Out Safety

It's that time of the year when many of our scorching-hot highways are littered with remnants of tire blowouts. Of course, the best way to prevent blowouts is to make sure all tire maintenance guidelines are followed. But if a sudden tire blowout does occur, your drivers need to respond safely, without panicking. Here's some advice, provided by the Georgia Department of Driver Services, on how drivers should respond to a tire blowout:

- Grasp the steering wheel firmly and take your foot off the accelerator to allow the vehicle to roll to a stop.
- Apply the brakes lightly if necessary and safe to do so.
- Do not move to the shoulder of the road until the vehicle has slowed greatly. If the blowout causes the vehicle to swerve onto the shoulder, do not try to get back on the pavement. Let the vehicle coast to a stop.
- If the blowout has caused your vehicle to suddenly leave the roadway, don't panic. Take your foot off the accelerator, grip the steering wheel tightly and be prepared to withstand sudden shocks. Don't hit the brake pedal suddenly and hard. Use your brakes carefully.

Procedure for Breakdowns

Remember, call enterprise!

1. Take your vehicle to any Enterprise-authorized
2. Service center, or your local dealer or service provider.
3. Present your Enterprise Maintenance card to the service writer. If, for any reason, there are questions or issues at the shop, call (800) 325-8838.

Provide your vehicle unit number or last 8 of the VIN (work cannot begin unless you have provided this number). It is the Service Representative's responsibility to call the Enterprise National Service Department for authorization if costs exceed the self-authorization threshold of \$75, shown on the card.
